## CONTEMPLATE BIG LEASING OPERATION

Jack Sowell has secured a bond and lease on seven claims at Silver Point from I. Morasci. These claims adjoin the acreage of the Royal Hawaiian Mining Company on the north and they are just a short distance to the south of the property of the Round Mountain Lehigh Mining and Milling Company, being between those two corporations.

Associated with Mr. Sowell are P. C. Drescher, a well known wholesale merchant of Sacramento, and Henry Mitau of the same firm.

It is the purpose of these gentlemen to begin sinking at once to a depth of two hundred feet and at that point to crosscut to a lead toward the north. They have a four-foot body of ore which outcrops and can be followed along the surface of the ground for a distance of over 1500 feet. What the value or extent of this ore body is cannot be known until it has been properly opened up and it is with a view to doing this that the above campaign has been outlined.

On the property is a shaft which was worked in the early days by various companies and which is now down to a depth of 155 feet with some forty-five feet of stoping done. Mr. Sowell has been sampling in this old shaft and has had some excellent assay returns.

The following assays were made by A. D. Sly from average samples taken by disinterested parties along the whole depth of the shaft, viz: \$133.81, \$177.32, \$120.34, \$10.12, and \$82.60. Percy Train, the Manhattan assayer got returns of \$189.29 and

\$546.42 from samples which were delivered to him for assay.

With the present day facilities for mining, handling and milling such ore can be extracted at a big profit, whereas in the old days it was quite a different matter.

Eight hundred feet from the shaft is an outcropping from which a sample broken off at random assayed \$30.85. All of the foregoing figures represent silver values with a small amount of gold and about four per cent of copper.

A whim, car and track are at present being installed and later a gasoline power hoist will be used to carry on the work.

About a mile above the property is a spring from whence the water will be piped. Men have already been put to work developing this spring. Mr. Sowell also states that the present townsite of Shoshone is included in the bond and lease, having been originally located as a millsite and all the requirements fulfilled by which to retain possession of the same. This was done by Mr. Morasci, who has been in and about the district for some years prior to the discovery of gold.

Mr. Sowell estimates that there are at present about 7000 tons of ore on the dump which will run from \$40 to \$60 in silver, which it did not pay to ship in the early days.

Messrs. Drescher, Mitau and Sowell also have a lease on the Antelope, their block being 600 feet by 576 feet in extent. On this ground a shaft has been sunk forty feet, besides an incline shaft of seventy-two feet, and Mr. Sowell is confident that there is a good body of ore included in the area which he considers one of the best leases in the camp. The Paulsen-Blaisdell lease, the Husband-Cushing lease and the Bartlett-Travers lease are all on this same claim.

By Monday Mr. Sowell expects to have a whim at work. He intends to run 371 feet in a westerly direction on the lead which will take him to the boundary line. According to the terms of the lease, a steam hoist of no less than 25-horse power is to be installed not later than the month of August.

Fourteen feet of ledge has already been cut through, which give panings of wire gold, and the proposed incline will go down on this lead and it is expected that good values will be found as the men go down.

Mr. Drescher is expected in Round Mountain any day.—Round Mountain Nugget.

## WIFE ELOPED WITH COACHMAN

NEW YORK, April 29.—Alfred E. Dieterich, a wealthy young man of the Standard Oil Company, was today granted an interlocutory decree of divorce from his wife, Edna Young Dieterich, who eloped to Europe last December with Harry S. Brenchley, a coachman employed by Alfred Gwynne Vanderbilt.

By the decree Mrs. Dieterich is forbidden to marry again, but this will have no effect in France, where she and Brenchley are now living. Her family is bitterly opposed to her marrying the coachman, and with the hope that she may be induced to leave him, her mother, Mrs. Albert Young, will shortly go to Europe. This will be her second trip abroad in the hope of inducing Mrs. Dieterich to leave Brenchley.

If you desire ruling or binding in a first-class manner call up the Bonanza and our solicitor will attend to your wants.
